LEATHERETTE OFFICE CHAIRS

Leatherette is a premium synthetic material designed to mimic the sleek look and smooth feel of real leather. Its nonporous surface makes cleaning a breeze, and it's more scratch-resistant than genuine leather.

Our 100% vegan leatherette is the smart, sustainable choice for those who value both style and durability.

Built to withstand the demands of everyday use, it's the perfect match for office chairs that need to deliver on both comfort and longevity.

MIXED MATERIAL OFFICE CHAIRS

Visual Contrast and Style: Blending leather, fabric, and mesh offers a modern, sleek aesthetic with a dynamic mix of textures that add depth and character.

This combination delivers both sophistication and comfort, effortlessly complementing any office setting.

By placing fabric in low-contact areas and using leather or mesh on high-use surfaces, the design strikes a perfect balance—offering a premium feel without compromising on durability or budget.

METAL FRAME SEATING

A steel metal base for a chair offers superior strength and durability, ensuring the chair can support heavier loads and withstand daily use. Its refined, modern design enhances a variety of interior styles, bringing a contemporary flair to any space.

Steel is ideal for long-lasting indoor or outdoor furniture. Additionally, a steel base is low maintenance and easy to clean, providing convenience and practicality in busy environments.

REGENERATED LEATHER SEATING

Regenerated leather, also known as bonded leather, is made from leather trimmings and fibers that are bonded together using polyurethane or latex, creating a material that mimics the look and feel of genuine leather. It is a cost-effective option that provides a luxurious, leather-like appearance while being more affordable and sustainable.

Our regenerated leather seating is durable and easy to clean, making it a practical choice for side chairs in busy environments or homes with high traffic. Its smooth texture and modern finish add elegance to a chair, offering both style and comfort.

ROUND & OVAL TABLES

A round table promotes better conversation and interaction, as everyone can see and engage with one another without barriers. It maximizes space, making it ideal for small or compact areas while providing equal access to items placed in the center.

In a dining setting, it fosters a more intimate and communal atmosphere, encouraging shared experiences. For work, it enhances collaboration by allowing everyone to have an equal presence at the table, promoting teamwork and open discussion.

FURNISHINGS ELEVATED

RECTANGULAR TABLES & SIDEBOARDS

A rectangular table offers more surface area, making it ideal for larger gatherings or accommodating more dishes during meals. Its linear shape allows for efficient use of space, especially in longer or narrower rooms.

For work, it provides clear separation of space for each individual, which can be useful for tasks that require personal workspace. Additionally, it often fits more chairs, making it practical for formal meetings or dining events with a larger number of people.

BOOK TOWERS & SHELVING

Transform a blank wall into a focal point with our Wall Shelving and Book Towers, perfect for showcasing your favorite books, collectibles, or decorative accents.

Crafted from durable steel, lightweight woods, and veneers, our collections combine style and functionality. Whether used as a standalone accent or arranged in multiples, they create a striking visual statement for any space.

OUTDOOR FURNITURE

Premium outdoor furniture materials like solid steel, aluminum, and teakwood offer strength, weather resistance, and a sophisticated look, ideal for enduring outdoor environments.

Steel mesh, textylene mesh, and polyethylene rope are favored for their comfort, flexibility, and UV resistance, ensuring they retain their color and structure even in direct sunlight.

Powder-coated aluminum and cast iron, along with woven polyethylene rattan, provide a stylish yet resilient finish, combining aesthetic appeal with extra protection against rust and corrosion.
